

Applicants respectfully submit this objection has been overcome and should accordingly be withdrawn.

The drawings are also objected to under 37 CFR 1.83(a), as not showing every element of the invention specified in the claims, specifically a furnace. According to 37 CFR 1.81(a) drawings are to be furnished "where necessary for the understanding of the subject matter sought to be patented." Applicants submit that drawings showing a furnace are not necessary for understanding of the subject matter sought to be patented and are, therefore, not required under 37 CFR 1.81(a). Applicants respectfully submit that this objection has been overcome and should accordingly be withdrawn.

Written Description

Please amend the paragraph spanning lines 15-21 of page 2 and the paragraph spanning lines 9-17 of page 8 in the manner shown, to correct minor non-substantive errors. No new matter has been added. A clean version of the amended paragraphs is shown below. A marked-up version of the amended paragraphs is shown in Appendix A at the end of this response.

Clean version of amended paragraphs

Page 2 lines 15-21:

A1 Fig. 1 illustrates a substrate **102** and a pair of FETs **104a**, **104b**, each including a gate electrode **106** disposed over a gate dielectric layer **107**, and further including source/drain regions **112**. FETs **104a**, **104b** also have conventional sidewall spacers formed from layers **108** as shown. When a dielectric layer **114** of phosphorous doped glass is formed over substrate **102**
